COMPANY NAME: Shiloh Ranch

See back of page for General Information. If there is insufficient space for your answers, please number them in the space provided on the back of this form.

ITEM CONTINUATION

[illegible]

There are two principal types of surface water rights in California, riparian and appropriative rights.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available, including the following:

- “Statements of Water Diversion and Use”  
 “Information Pertaining to Water Rights in California”  
 “Water Rights for Stockponds Constructed Prior to 1969”  
 “Appropriation of Water in California”

STATE OF CALIFORNIA
